What type of things have you voice acted in (machinima, fan videos, etc)?: I have voiced in many different projects ranging from video games, to animations, to commercial projects and machinima. I have been a voice actor for

3 years. I don’t discriminate given what kind of video you are creating. I love voice acting in any kind of production, be it an abridged series or a commercial video game. What it really comes down to is whether I am interested in the product and have the time. If you like what you hear, give me a shout on my email. I look forward to hearing from you! I have a large range for Low to High and can manipulate my voice in many different ways, as displayed in my demos.

I record in a sound treated room. The equipment I use is a Shure KSM42, hooked into a focusrite audio interface. I record with Audition CS6. If you have a good plot and it's not something that I've already voiced in a few times (I.E. Highschool dramas, Vampire type dramas) then I'll be interested. Due to my schedules with my agent, and my second kid about to make his grand entrance, my turnaround times are a bit slow. Heck even my email responses take a few days.
